

PHILIP MORRIS
U.S.A.
INTER-OFFICE CORRESPONDENCE
RICHMOND, VIRGINIA

To: . Dr. H. R. Wakeham
From: . William B. Cridlin, Jr.
Subject: . Foreign Filing

Date: February 15, 1972

Enclosed is a copy of the list of patents which should be considered in the near future for foreign filing.

There may be some question as to the first two cases, since they are involved with a modification of the films used in our CP cigarette. Our present interest seems to have diminished in the particular coatings which these inventions will modify. Perhaps present interest doesn't warrant foreign filing of these two cases. The third case relating to the barrium electrode has been recommended for filing in several countries which we considered as being places where these electrodes would be likely to be manufactured. If you have any other suggestions for this list of countries, please let us know.

If possible, I would like your comments on this subject before March 15th.
